-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsai (U.S. Patent No. 6,361,489).

In regard to claims 1-3, Tsai teaches a medical instrument 10 comprised of a speculum 14 formed integrally with a body 12 further comprising an internal light source 38 which includes a light generator 40 such as an array of light emitting diodes (LEDs) 42 disposed on a printed circuit board 44 (see Figure 2). Tsai also teaches an internal power source 56 that is coupled to a DC-DC converter 52 which is coupled to the light generator 40 and LEDs 42 (see Figure 2 and col. 5, lines 43-48). Figure 1 shows that the light generator 40, LEDs 42 and converter 52 are integrated in one component that corresponds mechanically and electrically to a conventional electric light bulb (see also

col. 4, lines 35-50 where Tsai discussed using any suitable light generation means in place of light generator 40 and LEDs 42). A light pipe or fiber optic coupling 46 connects light outlet 48 and the light generator 40 (see Figure 2).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should note the following prior art references disclosing diagnostic instruments employing LEDs: Sheehan et al., U.S. Patent No. 6,319,199 and Stephen et al., U.S. Patent No. 4,652,093.
